Hoffmann Architects Wins AIA New England Emerging Professional Friendly Firm Award

September 2022 – Hoffmann Architects, an architecture and engineering firm specializing in the rehabilitation of building exteriors, was recognized for commitment to the advancement of emerging professionals with the **Emerging Professional Friendly Firm Award from the American Institute of Architects (AIA) New England Components**.

Comprised of AIA chapters from Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, the New England AIA Components recognize firms that actively foster the professional development and personal growth of emerging professionals through policies, initiatives, and opportunities. Hoffmann Architects was selected as a recipient of the 2022 AIA New England

Emerging Professional Friendly Firm designation for valuing emerging professionals, developing policies from an emerging professional lens, and recognizing the critical role of emerging professionals to sustaining the growth of the practice.

The AIA defines “Emerging Professional” as those “who have completed their academic studies up to the point of licensure or up to 10 years after completion of their academic studies.” ([AIA Center for Emerging Professionals](#))

On conferring the award, Gina Calabro, Hon. AIA CT, Executive Director and CEO of AIA Connecticut, remarked: “Hoffmann Architects has been chosen to receive this prestigious designation as the firm has displayed an outstanding commitment to the development of their Emerging Professional staff.”

Hoffmann Architects will be honored at the 2022 New England Architecture Awards ceremony on Saturday, October 1, 2022, hosted by AIA Rhode Island at South Street Landing in Providence, RI. More details about the New England AIA Components Emerging Professional Friendly Firm Awards program is available at <https://aianewengland.org/ep-friendly-firm-awards/>.

Founded in 1977, Hoffmann Architects specializes in the rehabilitation of the building envelope. The firm's work focuses on the exteriors of existing structures, diagnosing and resolving deterioration within facades, roofing systems, windows, waterproofing materials, plazas/terraces, parking garages, and historic and landmark structures. We provide consulting services for new building construction, as well as litigation and claim support. Our technical professionals investigate and correct damage resulting from time and weather, substandard or improper construction, design defects, material failures, poor workmanship, structural movement, and stress.
